

# Feel the dynamics of working in an innovative growth company!

Continia Software is one of the world's leading suppliers of Microsoft Dynamics add-on solutions for invoice and payment management. We are an innovative and rapidly growing software company with an open culture and lots of enthusiasm among everyone. Here are 3 good reasons to join the Continia-team:

## A rapidly growing company!

We have been growing year after year and have received the prestigious Gazelle-award 5 times in a row by the leading financial media organization Børsen. Our solutions are used by more than 8000 companies worldwide where our software help them streamline and automate their processes.

## Strong Danish roots for a global reach!

All our solutions are sold and implemented throughout the world by our extensive network of more than 800 partners. You will be part of a company that is highly respected within the field of Microsoft Dynamics for the solutions we offer and the service we provide – both nationally and internationally.

## Join some of the most talented people in the world!

At Continia Software, we are passionate about building solutions that solve problems. We have a flat organization, and you will be working with some of the most talented developers and specialists in Microsoft Dynamics. We work hard to leverage the unique qualities of everyone to build the strongest teams and the best solutions possible.

# NAV / Business Central Developer (Copenhagen)

**Continia Software is a leading provider within AP automation, expense management and banking solutions for Microsoft Dynamics 365 Business Central. To continue our steady growth, we are looking for talented Business Central developers to join our engineering team in Copenhagen.**

As a developer, your primary job will be working with peers to design and implement new functionality in our Continia Document Capture and Continia Expense Management solutions. You will be part of the full development cycle from design and development until the release to market. We work with the latest technologies from Microsoft and your peers will be some of the smartest developers within the world of NAV/Business Central. You will be working with solutions that is used by more than 3000 customers globally. The work you will do with us is development at scale, and your work will have a positive impact on thousands of customers globally.

## **As a developer, you will:**

- Produce high-quality code which is easy to read, understand and follows Continia/Microsoft standards.
- Be part of our senior engineering team in Copenhagen for Continia Document Capture and Continia Expense Management.
- Work with different teams within Continia to understand and build features or modules that address the needs of our customers.
- Be open for peer review of your own code and potentially perform code-review on peers.
- Make continual improvements to the overall solutions based on feedback and your own judgment.
- Provide 3rd level support to partners if our support department can not answer questions.

## **We believe that candidates with the following skill set and experience will be successful in this role:**

- 3+ years' experience with development in Microsoft Dynamics NAV/365 Business Central.
- Ability to quickly understand new business processes and translate them into practical solutions.
- Have attention to detail and focus on quality rather than quantity.
- Demonstrated ability to manage your own tasks and adjust to shifting priorities and timelines.
- Ability to work independently and in a collaborative team environment.

## **Interested?**

If you are interested in this position, you are more than welcome to contact Solution Manager, Tommy Olesen at [to@continia.com](mailto:to@continia.com).
