**... do you have more sent payment journal lines each month?**

See more price categories on page 2.

### Try for free for 30 days – after this you only pay 35 DKK per month!

As a user of Microsoft Dynamics 365 Business Central you can easily and inexpensively start using Continia Payment Management 365. You can install and try out all Continia solutions without registration and binding commitments for up to 30 days. To get started, simply choose to install your selected Continia solution through Microsoft AppSource.

### How is my consumption calculated?

At the end of each calendar month, your consumption and the total number of registered payments will be calculated. This number will determine your price by a simple look-up in our price table. Note that the number is based on total amount of sent payment in your Microsoft Dynamics 365 Business Central across all the companies that are registered in your license. This also means that there are:

- Free use in unlimited number of companies
- Free use of unlimited number of bank accounts
- Unlimited number of payment approvers

### How do I count payment journal lines?

A payment journal line is equal to a payout you send to the bank. This means that any status responses from the bank (via the additional module Direct communication) as well as imported account statements (from the supplementary package Statement Intelligence) do not count towards this statement. The count of payment journal lines only serves to define your final price to apply this solution. Through your Continia Dashboard inside Business Central, it will always be possible to see your current consumption for every single day.

### Get up to 50 % discount on additional modules

You can freely choose between the available additional feature modules. Note that upon activation of module no. 2, you will get a 25% discount of the price list. Likewise, activation of module no. 3 will trigger a 50% discount off the price.
